Yitzchak Rabin High School
Kiryat Yam, Israel

MEDICINE IS SOMETHING I HAVE BEEN INTERESTED IN SINCE LAST YEAR, AND THIS CLASS CONFIRMED MY PASSION FOR MEDICINE. I WANT TO BE A NEUROLOGIST BECAUSE I AM FASCINATED BY THE BRAIN."

This whole program is perfect for me. I love the concept of the Young Doctors program. This is the most interesting class in the entire school. We get to study human anatomy—it is our body and we need to know it.

I really want to be a doctor when I grow up. Medicine is something I have been interested in since last year, and this class confirmed my passion for medicine. I want to be a neurologist because I am fascinated by the brain.

The ability to operate on donated organs is incredible. No one else gets to do what we do here in this course. It is a fantastic opportunity. We are really fortunate to be able to do this. It is knowledge that is necessary for us. When I operated for the first time on lungs, it was so cool.

This school and this class have changed my life because it helped me realize my dream that I want to be a doctor.

ABOUT YITZCHAK RABIN HIGH SCHOOL

- Located in northern Israel, Yitzchak Rabin High School is the only secular high school in the under-resourced community of Kiryat Yam.
- This is the fourth year of World ORT Kadima Mada's full ownership of the school.
- Currently, 840 high school students attend Yitzchak Rabin High School.
- Yitzchak Rabin High School is ranked as the top school in mathematics in the northern region of Israel.
- Many students and their families are olim (new immigrants) from the former Soviet Union and Ethiopia.
- Many students come from low socio-economic backgrounds and single parent households.
- Teachers support their students by providing extra tutoring hours and free after-school activities
- The school places a premium on giving back to the community of Kiryat Yam. All students volunteer their time and complete 180 hours of volunteer work over the course of three years.
- Volunteer opportunities include learning ambulatory and emergency medical services, spending time with Holocaust survivors, partnering with individuals who face visual or hearing impairments, and mentoring at after-school centers.
