

**THANKS TO THE
WORLD ORT TAUB YOUNG
ENTREPRENEURSHIP PROGRAM,
I GAINED SELF-CONFIDENCE
AND EXPERIENCE SPEAKING IN
PUBLIC. THE TEAMWORK AND
COLLABORATION I WAS A PART
OF IS SOMETHING THAT WILL
REMAIN WITH ME
THROUGHOUT
MY LIFE.”**

OSHRI

Yitzchak Rabin High School
Kiryat Yam, Israel

Last year I participated in the World ORT Taub Young Entrepreneurship Program where my team created a product designed to help people in their everyday life. My team developed an adaptable device that serves as a customizable pillow, which we designed and produced using a 3D printer. Its adaptable design changed in different environments and could be used by a variety of people. I was part of the marketing team, a sub-group of our research and development.

From this experience, I gained a lot of self-confidence and very useful experience speaking in public. The teamwork and collaboration that we experienced is something that will remain with me throughout my life. My friends all worked together as one cohesive unit, and everyone had their own important part to play in the process.

Even though we did not win the competition, I was proud of my team and of myself for bringing our idea to life. It was a big achievement for all of us. We felt like a small part of something really big.

I want to be a neurosurgeon when I grow up. It has been my dream to become a doctor since I was three years old. I was not always sure what kind of doctor I would want to be, but now I am certain I want to be a neurosurgeon. Rabin High School and World ORT Kadima Mada laid the groundwork for the requisite knowledge I will need to become a doctor. Here I learn physics and chemistry, and I know this will help me at university and in life when I become a doctor.
