Hodayot, Israel

MY LIFE HAS CHANGED DRAMATICALLY SINCE LIVING AND STUDYING AT HODAYOT. ONE OF THE BIGGEST DIFFERENCES IS THAT I LEARNED TO READ, WRITE AND SPEAK IN HEBREW. FROM THERE, I STARTED TO UNDERSTAND EVERYONE, AND MAKE LOTS OF FRIENDS."

I came to Hodayot three years ago when I made Aliyah to Israel on my own from Russia. I wanted to come to Israel for a better life, and I felt that Hodayot would be the kind of education I need to open up opportunities for me in the future.

My life has changed dramatically since living and studying at Hodayot. One of the biggest differences is that I learned to read, write and speak in Hebrew. It was challenging at first, but now it is second nature and I even think in Hebrew now!

From there, I started to understand everyone, and make lots of friends. Since I have been here, I learned to play piano. My favorite composer is Bach. I also ride horses here at school, which is really fun.

They have a brand new culinary track here at school, which I am excited to be a part of. There are many hotels nearby, and this track will teach me skills that could prepare me for a career in the culinary field.

Ultimately, though I want to study medicine when I go to university, and I hope to become a doctor when I grow up. I want to be able to help people. I love studying biology and chemistry here and they will give me the tools that I need to prepare me for a great future.
